

3.11.17

Due in: 17.11.17

Year 6 Homework

Maths

Show that you can compare and order fractions. For example, which is larger: $\frac{4}{8}$ or $\frac{2}{5}$? How do you know?

Can you reduce fractions to their simplest form?

English

We are working hard to make sure that we use a range of advanced punctuation.

Show that you can use:

Brackets, dashes, colons, ellipses.

Reading

Find 5 effective descriptions that authors have used in a text. Think about why they are effective - has a simile or metaphor been included? Has the author chosen lots of adjectives and adverbs?

Spelling

Show me that you have been working on some of your year 5 and year 6 spellings from the test that you completed.

Homework can also be emailed to misshalfacree@bridlewood.swindon.sch.uk or misshulse@bridlewood.swindon.sch.uk
